

PUBLIC MEETING MINUTES

Wednesday July 26th, 2023, 10:30 am

This meeting will be held via zoom only

I. Regular Board Meeting Public Forum

A. Call to Order/start recording

Altman called the meeting to order at 10:33.

Altman, Schumacher, and Olsen were present, making quorum.

The meeting recording was started.

B. Board election of board officers – *Action*

Since it is a new fiscal year, the board needs to elect board officers.

The board feels things have been working well as is.

Olsen moved to proceed with the same officer positions as before. No Discussion. The motion passed unanimously.

Altman is president. Olsen is Vice President. Schumacher is Treasurer.

Schumacher's goal is to get off the board once there are other candidates/there have been some annexations.

C. Revise June Regular and Special Meeting Minutes - *Action*

Board members have reviewed the minutes with no comments.

Altman moved to approve both sets of meeting minutes as presented. No discussion. The motion passed unanimously.

D. Public comment on relevant non-agenda items – *Discuss*

None.

II. New Business

A. Board member updates and correspondence – *Discuss*

Altman and WGM group met with three DEQ members to discuss the project, potential hurdles and next steps for keeping funding and planned timelines. It seemed like a productive call and the DEQ is supportive of the project. It is expected that DEQ will produce an informal confirmation to BSRAD that the project is "feasible" in order to release the BSRAD funds that are contingent on feasibility finding. WGM and the District is working to check in with DEQ early and often.

DEQ requested additional environmental assessment documentation from the District and the board.

Discharge feasibility is the biggest feasibility grey area. The other checkmarks to document feasibility are physical access and the easements required to place infrastructure, lift station placements, etc. (as described in the feasibility assessment funding agreement with BSRAD and BSCWSD).

B. Annexation and Outreach Committee updates – *Discuss*

No committee meeting has happened since the last meeting.

WGM and Altman have been continuing conversations with stakeholders.

A committee meeting should be scheduled for August to coordinate efforts.

A Ramshorn HOA outreach meeting has been penciled in for October.

Altman proposed the week of August 20th for a meeting. That week works for Kristin Garner (GRTF).

Boyne proposed redlines to the District’s annexation petition. They seem helpful. The board can consider using these updates in their standard template. Altman would like the Districts legal counsel to review this and will coordinate this review.

C. BSCWSD-BSRAD-GCCWSD “joint project subcommittee” Updates – *Discuss*

A meeting is scheduled for August 14th. These subcommittee meetings will become more regular going forward to ensure coordination.

This next meeting will likely focus on rates, collection design, and DEQ discussion updates.

D. Canyon Sewer Project Updates – *Discuss*

Discharge permitting is the current push. The next field data collection effort is planned for this fall.

Highway 64 corridor survey is complete and will be incorporated into conveyance design soon.

Collection design is starting to progress towards 30% design.

E. Annual Fiscal Report to Local Government Services FY 23 – *Discuss*

Some end-of-year financial documents were presented. Note that the cash reserves shown are earmarked for paying current bills – and much of it will go towards the invoices that the board approved for payment/reimbursement from funders at the last board meeting.

The actual Annual Fiscal Report has been tabled until the next meeting. This report is due by the end of the year but it will be helpful to review it and submit closer to the end of the Fiscal year.

F. Fiscal Year 2024 budget update – *Discuss*

At the last meeting, a budget was proposed. After upcoming accountant input, this should be discussed further and approved at the next board meeting.

G. RRGL Grant Awarded – *Discuss*

WGM group applied for an RRGL grant last year on behalf of the District. It was just recently approved this year, bringing another \$125,000 for Phase 1.2 (construction) of the Sewer Project.

Some start up conditions need to be met to fully secure funds. WMG group has covered this to date under the ARPA administration contract.

All of the District's grant applications have been awarded. There are no more outstanding grant applications.

319 grant funds will be evaluated to see if it is worth applying for.

Altman asked if the District can apply again to these funders in future rounds. Unless there is a separate project (sewer collection expansion in the future, or a centralized water project, etc) they can't be tapped again. There is a chance that additional ARPA funds will become available, if the currently awarded funds are not used by the deadline (2026).

This brings the awarded grants for the sewer project to over \$15 million.

H. WGM Group Updates – Discuss

The board has been provided AE2S's rate and fee study. They should review and provide comments and questions to be addressed before the study is finalized.

The board needs more time to digest the report fully. Olsen's initial impression is that fees are expensive (especially the hookup fees). Olsen is curious where the treatment costs used in the analysis came from. Much of this will come down to the agreement between the two Districts on how treatment and disposal services provided will be valued. This can be a major topic of the BSCWSD-BSRAD-GCCWSD joint subcommittee meetings.

Rates are being estimated as the lowest value that qualifies for the full MCEP grant award. The remaining funds can be allocated to connection fees. Note that the engineering firms and District are looking for strategies to lower or offset the connection fees for existing users.

Daniel from BSRAD needs to be in the subcommittee meetings.

-

As part of the discharge permitting and data collection efforts, DEQ coordination is ongoing.

From these conversations, it has been recommended that land application and irrigation with the treated effluent as well as additional groundwater discharge options be evaluated further. The previously identified FWP location will likely not be available for District use so other areas in the south of the expected future district area should be evaluated further. This evaluation should be started soon.

Normally DEQ will do an environmental assessment. However, if they are provided a draft environmental assessment, that will help move the approval process along faster.

These tasks are proposed in the WGM Group Work Order 3.

I. Sewer Project WGM Group Work Order 3 – Action

Sewer project related contracts are covered with the previous RFQ effort. District and grant admin type scopes are not.

Work Order 3 was reviewed.

Olsen moved to move forward with Work Order 3 and authorize Scott to sign. No discussion. The motion passed unanimously.

J. BSRAD Draw Requests – Action

There is no new draw request at this time. Reimbursement from last month's draw request is pending.

K. Subcontractor Insurance Agreement – Action

Altman was authorized at the last meeting to enter into insurance contract with the best option available, not to exceed the cost of the existing quote (~\$9,000). The outstanding coverage applications were denied since the District is a fairly new entity with a high perceived risk to the potential insurance providers. Altman is finalizing coverage with the original quote provider.

Additionally, the insurance broker told the District they need to require subcontractors to have proof of adequate insurance coverage in order to comply with District insurance policies and provided a draft document, which was reviewed. The District can edit this as they see fit and include it in future contracts. Some clarification on who counts as a subcontractor is needed still.

No official action is required at this time.

III. Old Business

A. Fiscal year 24 Insurance – Discuss

Discussed above.

B. Responses Water PER Engineering services RFQ – Discuss

The RFQ is out on the website and being published in the Chronicle. Responses are due by August 9th.

Altman has received one question so far, asking if the District is happy with WGM Group and likely to select them again.

Hard copies of responses to the RFQ are to be left at the BSCWSD and time-stamped by the BSCWSD clerk.

C. Bylaw update – Discuss, maybe Action

This has been tabled until the next meeting.

D. District Legal Counsel Letters of Engagement (Matt Williams) – Discuss, maybe Action

This has been tabled until the next meeting. Altman plans on meeting with Matt Williams soon to discuss this, bylaws and annexation agreements.

E. Board Member COI Disclosure (Schumacher) – Discuss

This has been tabled until the next meeting.

IV. Any Other Business Which May Properly Come Before the Board – Discuss

V. Next Meeting Planning

A. Date & Draft Agenda – Discuss

The next board meeting was set for 10:30 on August 30th.

VI. Adjourn

Olsen moved to adjourn at 11:17. Schumacher seconded. No discussion. The motion passed unanimously.

Minutes Drafted by: Michelle Pond, WGM Group

Minutes Approved: 8/30/2023

Signed: Scott Alman, Board President

**Before the Gallatin County Canyon
Water and Sewer District**

Petition for Annexation

Whereas, ~~Boyne Properties, Inc. (insert name of landowner)~~ (“Petitioner”) owns all that real property set out and described on Exhibit A hereto in Gallatin County, Montana; (the “Lands”);

Whereas, Petitioner ~~desires wishes~~ to incorporate the Lands within the boundaries of the Gallatin County Canyon Water and Sewer District (the “District”), and otherwise annex the Lands within the District;

Whereas, the District does not presently own or have access to wastewater treatment and/or disposal, or water diversion and distribution facilities for either the Lands or any property currently within its boundaries, and therefore the District cannot yet determine what the fees, costs, or expenses will be to the Petitioner for the services and/or facilities to be provided by the District;

Whereas, the District is assessing and evaluating an agreement with the Big Sky County Water and Sewer District to provide for wastewater treatment from the District;

~~Whereas, notwithstanding the current lack of water and wastewater facilities and service, Petitioner desires to incorporate the lands within the boundaries of the District;~~

Whereas, in the event the District enters into an agreement or contract with the Big Sky Water and Sewer District to provide for wastewater treatment, or any other agreement or contract to otherwise procure facilities to provide for such treatment, the District shall provide Petitioner with written notice of the agreement or contract, along with a copy of the agreement or contract. The District’s notice shall be deemed delivered as follows: if by hand delivery, at the time it is hand delivered; if by mail, three (3) days after it is mailed; if by email, forty-eight (48) hours after it is emailed.

Whereas, Petitioner shall have sixty (60) calendar days from delivery of the written notice described in the preceding paragraph to exclude its Land from the District, by providing

written notice to the District. Petitioner's notice pursuant to this paragraph is deemed provided at the time it is personally delivered, mailed, or emailed. If such written notice is timely provided, then and in that event the District shall by resolution exclude the Land owned by Petitioner from the District;

Whereas, the District will not assess or otherwise charge ~~Petitioner landowners within its boundaries~~ any fee, cost, or other expense unless and until the sixty (60) calendar days has expired and Petitioner has not timely provided written notice of its intent to exclude the Land from the District~~it enters into contracts or agreements with the Big Sky Water and Sewer District to provide for wastewater treatment within the District, or otherwise enters in contracts or agreements to procure facilities to provide for such treatment;~~

~~Whereas, in the event that Petitioner gives notice in writing to the District of its intent to exclude its Lands from the District within sixty (60) calendar days of the effective date of any agreement or contract with the Big Sky Water and Sewer District to provide for wastewater treatment, or within sixty (60) calendar days of the effective date of any agreement or contract to otherwise procure facilities to provide for such treatment, then and in that event the District shall be resolution exclude any Lands owned by Petitioner from the District;~~

(include where applicable) Whereas, Petitioner presently owns and uses a wastewater system and groundwater well on the Lands that are exercised to provide water and treatment in amounts that equal (insert) Equivalent Domestic Unit, as that term is used by the Department of Environmental Quality;

(include where applicable) Whereas, Petitioner does not intend to retire or otherwise eliminate the presently existing wastewater system and groundwater well used on the Lands solely as a result of annexing such lands within the District;

Whereas, any notice required to be provided pursuant to this Petition for Annexation shall be delivered to the following persons:

Gallatin Canyon Water & Sewer District _____ _____ Email: _____	Boyne Properties, Inc. c/o Chad Wilson _____ _____ Email: _____
--	---

Either party may designate a new person to receive notice by providing written notice of the new person and that person's name, address, and email address.

NOW THEREFORE, in accordance with the foregoing recitals, Petitioner requests that the District adopt a resolution annexing ~~these lands~~ Land set forth in Exhibit A hereto within the boundaries of the District.

Dated this _____ day of _____, 2023

Petitioner

By: _____

Re: 2023 Renewable Resource Grant Award for Gallatin Canyon County Water Sewer District - Gallatin Canyon Sewer Project - Phase 1.2

Scott Altman,

Congratulation on your recent DNRC Renewable Resource Grant and Loan Program (RRGL) award for the Gallatin Canyon County Water Sewer District - Gallatin Canyon Sewer Project - Phase 1.2 project. DNRC will be hiring a new grant manager for this project. Until the new hire is trained, please contact me with any changes or updates regarding your award. All grant management will be through your Submittable Account www.dnrc.grants.mt.gov unless otherwise notified.

To enter into an agreement with DNRC you will need to submit your updated project schedule, scope, and budget as required in our contract. Once we begin the contracting process, you'll be required to provide a grant management plan, matching fund documentation, and any other necessary items which need to be updated related to your project. A start-up checklist will be sent to you after 07/01/2023 to start this process.

For more information on our program, you can go to our FAQ Document online.

https://dnrc.mt.gov/_docs/conservation/RD-Bureau/RRGL/RRG-Grant-Sponsor-FAQ-linked.pdf

Sincerely,

Sonja Hoeglund

Sonja Hoeglund
Interim Grant Manager

MASTER SERVICES AGREEMENT WORK ORDER #3

PROJECT TITLE: Canyon Sewer Engineering
CLIENT: Gallatin County Canyon Water and Sewer District
WGM GROUP PROJECT NUMBER: 220724

As stated in the Master Services Agreement (Agreement) for the above-referenced client dated March 31, 2023, the Agreement may be amended by written amendment executed by both parties as defined in Work Orders incorporated into the Agreement. This document details the scope and fee associated with Work Order #3. By both parties signing below, this document becomes incorporated into the Agreement as an Exhibit and is subject to the terms and conditions of said Agreement.

Services under this Work Order include provide preliminary analysis and design of expanded wastewater disposal opportunities including land application, reuse irrigation and additional opportunities in the vicinity of the school. The scope also includes a baseline Environmental Assessment and environmental impact analysis intended to aid and expedite DEQ discharge permitting review.

WORK ORDER SCOPE OF SERVICES:

Phase 01: Project Management & QA/QC **\$9,000**

WGM's project manager will actively manage the project team, allocating appropriate resources and keeping in regular contact with the client. The PM will proactively evaluate project progress, calculating earned value to ensure we're on track at each step in the process. The following items are included:

- Develop, manage and communicate project scope, schedule and budget
- Oversight, coordination, resource allocation, and task delegation with WGM internal team and Project Team subconsultants
- Client correspondence and Project Team meetings
- Assist Client with Stakeholder identification and Project communication
- Earned value estimating and invoicing
- Internal QA/QC of project scope, schedule, production and deliverables
- QA/QC review and compilation of overall Project/Team design and deliverables

Deliverables: Scope, fee estimate, contract, team meetings, monthly progress update correspondence to Client, "Living" Project schedule using Microsoft Project, Monthly Client Design/Progress meetings to include agendas, minutes and presentation slides.

Assumptions: Project communication will be provided directly to Client. WGM will assist Client to determine Stakeholder communication plan, including engaging and selecting a 3rd party PR firm if desired.

Phase 02: Expanded Disposal Feasibility (New Discharge System Areas and Applications) \$64,000

Phase consists of an expanded feasibility investigation building off the initial Feasibility Study and review of alternative disposal options including reuse irrigation and land application within the Canyon area.

Further investigation and initial design concepts for potential new disposal systems will help to better inform round 2 of SAP fieldwork data collection anticipated to take place in September 2023 under current Phase 2-WO#1, as well as engineering design of other infrastructure in process under WO#2.

Objectives:

Provide design concepts and generate preliminary design packages, including initial set up of plan sheets, design report templates related to the potential new disposal systems, updated cost estimates which will guide final design and planning for project scheduling, sampling, funding, and permitting.

Quantification and Effluent Dilution Screening: Provide an expanded and targeted evaluation of disposal capacity based on site-specific characteristics of a few alternative disposal sites and methods of application in new locations. In coordination with AE2S under their existing scope, this will also include effluent quality analysis to further inform the Class I effluent characteristics that need to be maintained if irrigation is pursued with focus on specific conductivity dilution capabilities to better understand salinity versus nutrient concentrations.

Reuse / Land Application: Provide review of existing or new irrigation areas in the Canyon area that would provide capacity for land application and/or other reuse options. This phase will include evaluation of a water balance and storage strategy for viable reuse / land application to communicate how these alternatives could be incorporated into the project.

Disposal Design Concepts: Provide engineering design concepts of new disposal system options along the Project Area extents. Design consists of 2D alignment layouts, system type selection and preliminary sizing. Layouts will inform future SAP efforts.

Easement Requirements: Identify and illustrate approximate area(s) requiring permanent and/or temporary easements to accommodate the work, specific to location of new disposal system options. Identify affected property owners to initiate easement acquisition planning in a future work order.

Construction Plan Initiation: Set up initial structure for plan sheet set to include preliminary plan and profile of new targeted disposal areas and compile typical details for project requirements. These plan sheets are intended to be paired with the 30% engineering infrastructure design set (WO#2) but will not be completed to a 30% level until SAP fieldwork data (WO#1) can be completed and further analyzed with modeling as well as DEQ coordination for permitting.

DEQ Coordination and Disposal System Design Report Initiation: Set up template design report formatted to address DEQ's report requirements for new public wastewater disposal systems. Coordinate meetings with DEQ to review new disposal system options.

Design EOPCC: Develop preliminary estimates for Engineer's Opinion of Probable Construction Cost for disposal system options.

Design QA/QC: Internal preliminary Design QA/QC review of disposal design options. QA/QC review/coordination between Project Team to eliminate design conflicts across overall project extents.

Expanded Feasibility Technical Memorandum and Owner Review: Provide design concept deliverables in the form of a technical memorandum to Client for review. After Client review, schedule and lead meeting to discuss design and address/document Client comments. Client/meeting review comments and recommendations to be incorporated into next progression of design development upon execution of new

work order to advance beyond concept level design, all dependent on SAP fieldwork, modeling, and DEQ coordination.

Deliverables: PDF of Preliminary Disposal Design Concept Drawings, Preliminary Disposal Design EOPCC, Expanded Disposal Feasibility Technical Memorandum.

Exclusions: Regulatory permitting applications/submittals, Easement Agreements and/or Exhibits. The disposal design will target conceptual level analysis and is not intended to be on the same timeline as the 30% infrastructure design in WO#2.

Phase 03: Baseline Environmental Assessment **\$24,500**

Phase consists of development of a baseline environmental assessment (EA) and screening analysis focused on the general Gallatin Canyon area for use in discharge permitting coordination efforts with DEQ.

Objectives:

Provide a baseline EA to facilitate initial discussions regarding overall review of the general Project area and environmental impact analysis. This assessment is intended to provide the basis for a future expanded effort that will include a more targeted EA focused on site-specific areas once discharge locations are confirmed. The EA may also act as a basis for any follow-up EA documentation required by project funding entities. The targeted EA and/or any funding specific EA is not included in this scope. This baseline is intended to aid in the evaluation of public comments as needed if the Montana DNRC and/or DEQ determine that the MEPA review should result in a more formal draft Environmental Assessment.

Public Participation: In accordance with public funding requirements, seek public participation from stakeholders and community members and solicit comments from Agency representatives, including but not limited to USFWS, FWP, DNRC, and DEQ. Identify any previous environmental review or other existing documents related to the proposed action area. Public meetings will be held to help facilitate this process. The public meeting process is already included in a separate scope.

Baseline EA: Prepare a Preliminary Environmental Assessment/Summary for DEQ. This document will include:

- (a) Introduction, Proposed Action, Purpose and Need for action,
- (b) Description and analysis of reasonable alternatives,
- (c) Existing conditions, description of the affected environment,
- (d) Environmental impact analysis for all physical and human environment categories on the State of Montana Environmental Policy Act Checklist. Includes evaluation of appropriate minimization and mitigation measures, and
- (e) Response to applicable public and agency comments received to date.

Agency Coordination: The baseline EA document will be shared with DEQ for their evaluation and input on proceeding with next steps in the discharge permitting scope.

Deliverables: Baseline Environmental Assessment including MEPA Checklist

Exclusions: An agency required EA and/or any funding specific EA is not included in this scope, but a second phase to this EA process is anticipated to address agency requirements as needed in a subsequent work order.

ADDITIONAL SERVICES

Services not specifically described in the tasks above are not included in this scope of work.

FEE ESTIMATE

Our fees will be billed on time and materials basis with a budget of **\$97,500**. Fees are valid through August 2024 and may need to be adjusted if the project extends beyond this date. A cost summary is provided below.

COST SUMMARY		
01	Project Management & QA/QC	\$9,000
02	Expanded Disposal Feasibility (New Discharge Systems)	\$64,000
03	Baseline Environmental Assessment	\$24,500
	TOTAL	\$97,500

SCHEDULE

WGM is prepared to begin work within 3-weeks of contract execution. The above scope is anticipated to be completed in four to six months. Deliverable schedule for individual phases will be coordinated with Client to support timely project advancement.
